No. 37

****

Beloved Children:

The approach of the Christmas Holidays brings the Presence of the Masters and the Angelic Host very much closer to the consciousness of the people of Earth than at other times; therefore We shall appreciate any calls you may choose to give for the unfoldment of the higher nature of the race during the next few weeks.

As this Season is most advantageous for Our spiritual harvest, We press into the Seven Holy Weeks period all the Light that the Cosmic Law will allow Us to give in balance for mankind's upreaching thought and feeling to the octave of Celestial Giving. Therefore the intensification of the calls and invocation of conscious students at this time doubles and trebles Our opportunities to give, so if you care to lift your thought heavenward, beloved ones, particularly during Christmas week itself, you will have afforded Us a personal blessing, as the greatest gift We can give to mankind is more of Ourselves.

When a man has a plan in his mind that he would choose to fulfill which would be of benefit and comfort to a group of people, he is grateful for the dedication of the service, energy and talent of any individual who can quicken his accomplishment and bring to fruition, more speedily, his plan. As two can accomplish more than one here on the planet Earth, so can two - an Ascended Being and a human being when they are united accomplish more than the Ascended Being Who is working alone. This sounds like a startling statement for the Master is considered omnipotent and omniscient,

which, of course, He is in His own sphere of activity, but there is no such thing as a power for good that cannot be amplified by another created being's effort. For instance, in a beautiful field of calla lilies, one more blossom adds to the perfume and the perfection of the visual piece. The Ascended Being therefore, in His cosmic task, finds His service greatly amplified if even one unascended being gives Him the energy of his life unreservedly with the silent design to help the Master's purpose. The gratitude and devotion of such an Ascended Being for the energy of an unascended friend is one of the most beautiful and heart-stirring experiences that one can look upon.

Not so long ago I stood at a conclave of Cosmic Beings around the throne of the Great Central Sun. Our company numbered in the hundreds of thousands, and I was one of the least among Them. We had come to find His Will regarding a certain group of stars in our system. As We faced this exquisite One, I shall never forget the outpouring of love from His heart in gratitude for the voluntary service of Our energy to His purpose; nor shall I forget the particular benediction that I shared with all assembled there that hour; nor shall any of Us so privileged to be chosen as His Messengers forget, in Our service to Our lesser brothers, that His gratitude to us meant. They say it is even so in the realms to which My consciousness has not yet achieved a waking remembrance. Therefore, I would like to assure the people of Earth that any service they can give Our Cause would be the most beautiful Christmas Gift they could offer Us.

Blessings and Love,

MAHA CHOHAN
